

gost_ctx

```
graph BT; openssl_gost_cipher_ctx[openssl_gost_cipher_ctx] -.->|cctx| gost_ctx[gost_ctx];
```

The diagram illustrates a pointer relationship between two context structures. At the top is a white rectangular box labeled 'gost_ctx'. At the bottom is a gray rectangular box labeled 'openssl_gost_cipher_ctx'. A dashed purple arrow points from the 'openssl_gost_cipher_ctx' box up to the 'gost_ctx' box. The label 'cctx' is positioned to the right of the arrow, indicating the variable used for the pointer.

cctx
